## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-29, drawn to a fuel cell having specific protection devices, classified in class 429, subclass 26.
  - II. Claims 30-53, drawn to a method of protecting a fuel cell, classified in class 429, subclass 13.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the apparatus as claimed can be used to practice another and materially different process, for example, a process involving the use of any other heat generating device such as a heat transfer device, or a heater or a combustor or a process involving the use of a coolant substance dissolved in the reactant stream; additionally, the process as claimed can be practiced by another materially different apparatus or by hand, for example, by an internal combustion engine, a burner or a chemical reactor or an electroplating device or an electrolyzer.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1745

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

*In addition, further restriction is required. Thus, applicant must elect one of the above group and one the species below.*

5. This application contains claims directed to the following patentably distinct species of the claimed invention:

Species 1: the fuel cell system of Figure 1;

Species 2: the fuel cell system of Figure 5;

Species 3: the fuel cell system of Figure 6;

Species 4: the fuel cell system of Figure 8;

Species 5: the fuel cell system of Figure 9;

Species 6: the fuel cell system of Figure 15 (fourth embodiment);

Species 7: the fuel cell system of Figure 15 (fifth embodiment);

Species 8: the fuel cell system of Figure 20;

Species 9: the fuel cell system of Figure 25;

Species 10: the fuel cell system of Figure 27;

Species 11: the fuel cell system of Figure 29;

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

6. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
